THE REVISION LESSON

Teach AI Your Taste

Generic in, **generic out.**

Grades 6–8

45-min lesson

No prep • No devices needed

STUDENT SESSION • PAGE 1 OF 3

My Taste File

Name: _____ Class: _____ Date: _____

Your For-You Page (the feed an app builds for you) didn't guess your taste — you taught it, one like at a time. Taste = what you like and how you like it. Unless you tell it — or it has saved notes about you — an AI doesn't know your taste. So you write yours down here in five numbered sections, and your editor uses it. An editor (your partner playing the AI, or a real AI) reads your writing and gives notes — short tips on what to change — but never rewrites for you. Your editor may know ONLY what's on this page.

SECTION 1 — THE VIBE

Tick the 3 tone words (the mood your words give off) that sound most like you:

- | | |
|---|-------------------------------------|
| ☐ funny | ☐ chill |
| ☐ loud and excited | ☐ dreamy |
| ☐ blunt | ☐ dramatic |
| ☐ quiet | ☐ poetic |
| ☐ bold | ☐ mysterious |

One tone word of your own: _____

SECTION 2 — HOW I LIKE IT SERVED

Tick every format you actually enjoy reading:

- ☐ short and punchy
- ☐ story mode
- ☐ lists
- ☐ step-by-step
- ☐ big idea first, details after

SECTION 3 — PEEVES

Finish it two ways: "Editor, never do this to my writing..." (Example: "Don't make me sound like a textbook.")

SECTION 4 — SO ME / NOT ME

Write one sentence about your weekend that sounds **exactly like you**. Then say the same thing in a voice that is **NOT you** — a robot, a textbook, a fancy poet.

SO ME

NOT ME

SECTION 5 — WHAT I'M INTO RIGHT NOW

Music, shows, games — the feel of what you like right now ("fast anime-style battles," "sad songs on repeat"):

FOR THE TEACHER

Teacher Guide & Answer Key

Teach AI Your Taste — one worked example from taste file to exit answers, a key for every student item, coaching the "AI editor" role and the 1-minute talk, when it goes sideways, the copy-ready AI prompt, and full standards text.

WHY THIS LESSON

When an AI can draft almost anything on request, what still separates students is **taste** — knowing what's *them* and saying it precisely. The Taste File makes that visible, and the editor loop (**draft yourself** → **get specific notes** → **revise yourself**) is W.6.5 in miniature with the classroom AI policy built in: *AI is your editor, not your ghostwriter*. One honest limit of the analogy, worth saying aloud: the feed remembers what you liked; most AI chats don't keep your taste file between sessions unless the tool saves notes about you. Stands alone.

COACHING THE "AI EDITOR" ROLE

Three rules, and holding them IS the rigor: **use only the taste file** (a note that can't name a section gets cut), **exactly 2 notes** (editors prioritize), **notes, not rewrites** (the second the editor writes a sentence, they've become a ghostwriter). **The 1-minute talk** (Step 2, sample on the sheet) is where SL.6.1 lives: editor reads both notes aloud, writer asks ONE question, editor answers from the taste file only. Sample 3–4 pairs; listen for an answer that cites a section (Section 3 says no textbook words"), not the editor's own taste ("I'd just make it funnier")

ONE WORKED EXAMPLE — JAYLEN, START TO FINISH

ITEM	JAYLEN'S WORK — no single right taste exists; score specificity and movement toward the file
Taste File	S1: funny, blunt, quiet (+ "dry"). S2: short and punchy, lists. S3: "Never use words I'd have to look up." / "No exclamation points. I don't shout." S4 So me: "Saturday I made the world's saddest pancake and ate it anyway." Not me: "On Saturday I prepared a breakfast item that did not meet expectations." S5: "fast anime-style battles, quiet songs."
Step 1 draft	"Hello and welcome to my channel! I enjoy various hobbies such as gaming and cooking. I upload content on a regular basis. Please consider subscribing!"
Step 2 notes (editor: Priya)	Note 1 → Section 3 : "'I enjoy various hobbies' is textbook voice. Which hobby, said your way?" Note 2 → Section 1 : "Your file says blunt and quiet — two exclamation points is shouting. Say it like you'd text it."
The talk	Priya reads both notes. Jaylen: "Which sentence is the textbook one?" Priya: "Sentence 2. Section 3 says no look-up words — your pancake line is how you actually talk."
Step 3 revision	"Welcome to the channel where I *lose at games and cook worse*. *Mostly fast fights, sometimes pancakes.* *New video every Friday.* *Sub or don't — the pancakes will still be sad.*"
Last Check	#1 "'I enjoy various hobbies such as gaming and cooking' → 'I lose at games and cook worse.'" #2 "Section 3 says no textbook words; Section 1 says funny and blunt." #3 "'Make it better' doesn't say what's wrong or what better means for ME. The note that named Section 3 told me which sentence and why."

THE REVISION LESSON • LESSON 4 OF 6

Teach AI Your Taste

Your For-You Page didn't guess your taste — you taught it, one like at a time. Unless you tell it (or it has saved notes about you), an AI doesn't know yours. Students write theirs down in a one-page Taste File, then draft, get two notes, and revise. 45 min; stands alone.

AT A GLANCE

TIME	MATERIALS	TECH NEEDED	PREP
45 min	Worksheet, 3 pages, 1 per student (a typeable PDF copy is included) • Slides (optional; script in the notes) • board or projector • Teacher Guide (worked example, AI prompt) • pens	None — fully unplugged. Optional: projector; one AI tool on the teacher's screen for Step 2	Print worksheets. That's it.

OBJECTIVES — STUDENTS CAN

- Explain why vague input gets vague feedback — from an app, an AI, or a person. (*Last Check #3*)
- Build a **Taste File**: a one-page style guide an editor can actually use. (*Worksheet p.1, Sections 1–3*)
- Run the **editor loop** — draft, two specific notes, revise — the human writing at both ends. (*Steps 1–3, Last Check #1–2*)

STANDARDS ALIGNMENT (full text + taught/assessed in the Teacher Guide)

CCSS ELA W.6.5

ISTE 1.6.b

CCSS ELA SL.6.1

♥ WARM-UP — THE ALGORITHM KNOWS YOU (6 MIN)

Open: "Raise your hand if your feed knows you a little too well." Then: "Two people download the same app on the same day. A month later one feed has all horror edits, the other all cooking videos. The app didn't guess — how did it learn?" Take 2–3 volunteers. Land on: every like, skip, rewatch and follow is a signal. You taught it your taste.

Bridge: "Unless you tell it — or it has saved notes about you — an AI doesn't know your taste. Today you write yours down on one page, then use it to make YOUR OWN writing better."

What if "my feed is random"? "Random is a signal too — what do you skip in the first second?" Nobody raises a hand? Name your own feed first.

Transition: "So what happens when the editor knows nothing about you? Watch."

DIRECT INSTRUCTION — GENERIC IN, GENERIC OUT (8 MIN)

1 — Generic in, generic out. "Give me feedback on my paragraph" gets notes for a generic writer: "add detail." True for anyone, useful to no one.

2 — The Taste File. One page: tone, formats, pet peeves, one "so me" sentence. Hand it to any editor and the notes finally fit YOU. (*If your class did the genie lesson: it's your Requirements, written once.*)

3 — The editor loop. YOU draft → editor gives notes → YOU revise. Say it plainly: "AI is your editor, not your ghostwriter."

Watch one get fixed — on the board: "Make it more interesting" vs. "Your taste file says *funny and blunt* — sentence 2 sounds like a homework robot. Say it like you'd text it." Ask which note they could act on.

What if "the AI I use already knows me"? "Some tools save notes about you. A fresh chat usually doesn't. Either way, the file makes sure the notes fit."

Transition: "Page 1. Your taste, written down — five sections, twelve minutes, solo. Nobody swaps yet."
