

STUDENT SESSION

The Studio Task Board

Name: _____ Class: _____ Date: _____

You run Big Dream Studio — a small recording studio. **Nia** owns the place and coaches the artists. **Ravi** runs the mixing boards. **Jaylen** runs the front desk. There's too much to do, so the crew just got an AI assistant. Your job: decide what it does — and what it never touches.

- **AUTOMATE** — boring and repeating. Hand it to AI.
- **AUGMENT** — a human makes the call, AI helps out.
- **KEEP HUMAN** — coaching, taste, being there for someone. Humans only.

THIS WEEK AT BIG DREAM STUDIO

SORT THE BOARD

Write each letter where you'd put it. **House rule:** every column needs at least two tasks. Disagree with your partner? Good — talk it out. That's the lesson.

AUTOMATE — HAND IT TO AI	AUGMENT — AI HELPS OUT	KEEP HUMAN — HUMANS ONLY

**THE TRADE — EVERY CALL HAS A COST**

Every choice helps someone, costs someone, and could backfire. (Grown-ups call this a **tradeoff** — now you know the word.) Pick **TWO** of your calls from the board and write the trade. "Because robots" is not a reason.

Call #1 — Task letter: _____ My column (circle one): **AUTOMATE / AUGMENT / KEEP HUMAN**

Who wins? _____

Who loses, or loses something? _____

What could go wrong? _____

Call #2 — Task letter: _____ My column (circle one): **AUTOMATE / AUGMENT / KEEP HUMAN**

Who wins? _____

Who loses, or loses something? _____

What could go wrong? _____

**DEFEND IT — SAY IT OUT LOUD**

Get ready to defend ONE choice to another pair — and maybe the whole room. Look up, speak up, and land the trade:

Task _____ belongs in _____ because _____

— and the trade is _____

**EXIT TICKET — TAKE IT HOME**

Think of a job someone in your life actually has — family, neighbor, coach, teacher. Run their task board.

The job: _____

AUTOMATE — one boring, repeating task AI should take: _____

AUGMENT — one task where the human makes the call and AI helps out: _____

KEEP HUMAN — one task that should stay fully human, and why: _____

The move to remember: let the robots do the boring work. Leave the humans to do the human things. The people who win with AI aren't the ones who fear it — they're the ones who decide what it does.
