

STUDENT SESSION

Playlist Check

Name: _____ Partner: _____ Class: _____ Date: _____

You are the AI. The playlist below is your **training data** — every song you have ever "heard." Work in pairs. **Partner A is the App:** you pick the song. **Partner B is the Request Line:** you read each request out loud, like a caller on a radio show. Swap jobs after request #3. To **serve** a song means to pick a card and hand it over. Three rules:

- **Rule 1:** Only serve cards from the playlist. No inventing songs mid-game.
- **Rule 2:** Never say no. Serve the closest card you've got — a music app always gives you *something*.
- **Rule 3:** Check ONE Fit box (Perfect / Kind of / Nothing) honestly, on your own sheet. Your checks are the data.

THE PLAYLIST — ALL 12 SONGS YOU KNOW

Thunder Mode Hype Trap · Fast · Party	Bass Quake Electro Party · Fast · Party	Level Up Anthem Hype Trap · Fast · Gym	Full Court Press Stadium Hype · Fast · Sports
Neon Stampede Electro Party · Fast · Party	Turbo Turbo Electro Party · Fast · Gym	Crowd Goes Wild Stadium Hype · Fast · Sports	Volume War Hype Trap · Fast · Party
Midnight Sprint Electro Party · Fast · Gym	Glow Up Tonight Party Pop · Fast · Party	Confetti Cannon Party Pop · Fast · Party	Cool Down (Kinda) Party Pop · Medium · Party

Hype = loud and exciting. Cut the cards apart, or just point. Notice anything about this playlist yet? Keep that idea for later.

SERVE THE REQUEST LINE

Request Line reads it. App names the best card. Both of you write the card and check ONE Fit box on your own sheet.

REQUEST	BEST CARD IN YOUR PLAYLIST	PERFECT FIT	KIND OF FITS	NOTHING FITS
1. Priya needs a hype song for when the basketball team runs onto the court.		☐	☐	☐
2. Nia wants something calm to study to before the math test.		☐	☐	☐
3. Tomás wants a song in Spanish for his abuela's (grandma's) birthday dinner.		☐	☐	☐
4. Keisha wants a slow song for the last dance at the 8th-grade dance. (<i>Swap jobs first!</i>)		☐	☐	☐
5. Malik wants a first song for his party — one that makes everyone jump at once.		☐	☐	☐
6. Jordan wants a quiet guitar song for the talent-show sing-along.		☐	☐	☐
7. Ask the pair next to you for ONE request. Write it:		☐	☐	☐

**PLAYLIST GAP REPORT**

1. Who does this playlist serve really well? Name the people, not just the songs.

2. Who does it leave out — and what do they get served instead?

**REPEAT, THEN ADD**

Before you say your own idea, say your partner's idea back to them. Then add to it.

One gap my partner noticed (in their words):

Start with: "I heard you say..."

What I'd add to their idea:

Start with: "Building on that..."

**FIX THE PLAYLIST**

Invent new song cards that fix the biggest gaps — at least 2, all 3 if you can. Title + genre + speed + what it's for, like the cards on page 1. Make them up! Every card should fix a **DIFFERENT** gap.

Title · genre · speed · what it's for

Title · genre · speed · what it's for

Title · genre · speed · what it's for

**EXIT TICKET**

1. Finish the chain: **INPUT** → _____ → **OUTPUT**. In your own words, what does an AI actually do with its playlist (training data)?

2. A school's new AI homework helper explains everything with football examples — never anything else. Using the word *playlist*, explain what probably happened, and who it doesn't serve well.

3. One gap your partner spotted, and the idea **YOU** added to it.
