AI Literacy • Lesson 4 of 6

THE REVISION LESSON

Teach AI Your Taste

The AI gives notes.
You stay the writer.

Grades 6–8

45-min lesson

No prep • No devices needed

STUDENT SESSION • PAGE 2 OF 3

The Editor's Chair

The loop: **YOU** draft → your editor gives notes → **YOU** revise. You are the **writer**. Your **editor** is your partner, playing the AI. They read your taste file, give 2 notes, and never rewrite.

♥ STEP 1 — DRAFT IT YOURSELF

Write 3–4 sentences: the **About Me** for a channel or profile page you would really make. Make it match your taste file. No AI, no partner.

♥ STEP 2 — THE EDITOR'S NOTES

Swap **ALL** pages with your partner. Now you are the **EDITOR**. (1) Read their taste file on page 1. (2) Read their draft. (3) Write 2 notes in the boxes below. Each note names a section (1–5) and says what doesn't match it. Notes only. Never write their sentence for them.

A good note sounds like this: "Section 1 says funny and blunt — sentence 2 sounds like a homework robot. Say it like you'd text a friend."

Note 1 — points at taste file section # _____

Note 2 — points at taste-file section # _____

♥ THEN TALK — 2 MINUTES

Speaker 1 is the partner whose first name comes first in the alphabet. Speaker 1 is the editor for the first minute: read your two notes out loud. Writer: ask **ONE** question. Editor: answer from **THEIR** taste file — never your own taste. Then switch: Speaker 2 is the editor for minute two. Then swap sheets back.

The writer's question: "Which sentence?" or "What would fit?"

FOR THE TEACHER

Teacher Guide & Answer Key

Teach AI Your Taste. Everything you need to coach and grade it: one student's work start to finish, a key for every item, and what to say when it goes sideways.

WHY THIS LESSON

When an AI can draft a paragraph on request, what still sets students apart is **taste** — knowing what's *them* and saying it precisely. The taste file makes that visible, and the editor loop (**draft yourself** → **get specific notes** → **revise yourself**) is W.6.5 in miniature with the classroom AI policy built in: *AI is your editor, not your ghostwriter*. A note is a skip with a reason. One honest limit, worth saying aloud: the feed remembers what you liked; most AI chats don't keep your taste file between sessions unless the tool saves notes about you. A good AI job runs **human** → **AI** → **human**: you draft, the AI gives the notes, you *revise*. It stands alone.

COACHING THE AI EDITOR ROLE

Three rules, and holding them IS the rigor: **use only the taste file** (a note that can't name a section gets cut), **exactly 2 notes** (editors prioritize), **notes, not rewrites** (the second the editor writes a sentence, they've become a ghostwriter). **The 2-minute talk** (turn order printed on page 2) is where SL.6.1 lives: Speaker 1 is the partner whose first name comes first in the alphabet. Speaker 1 edits first, then they switch. Every student reads two notes aloud and asks the question. Sample 3–4 pairs; listen for an answer that cites a section ("Section 3 says no textbook voice"), not the editor's own taste ("I'd just make it funnier").

ONE WORKED EXAMPLE — JAYLEN, START TO FINISH

ITEM	JAYLEN'S WORK — no single right taste exists; score specificity and movement toward the file
Taste File (p.1)	S1: funny, blunt, quiet (+ "dry"). S2: short and punchy, lists. S3: "Editor, never make me sound like a textbook." / "Editor, never use exclamation points. I don't shout." S4 So me: "Saturday I made the world's saddest pancake and ate it anyway." Not me: "On Saturday I prepared a breakfast item that did not meet expectations." S5: "fast anime-style battles, quiet songs."
Step 1 draft	"Hello and welcome to my channel! I enjoy various hobbies such as gaming and cooking. I upload content on a regular basis. Please consider subscribing!"
Step 2 notes (editor: Priya)	Note 1 → Section 3 : "'I enjoy various hobbies' is textbook voice. Which hobby, said your way?" Note 2 → Section 3 : "Your file says no exclamation points. Two of them is shouting. Say it like you'd text it."
The talk	(Jaylen is Speaker 1; this is minute two.) Priya reads both notes. Jaylen: "Which sentence is the textbook one?" Priya: "Sentence 2. Section 3 says no textbook voice — your pancake line is how you actually talk."
Step 3 revision	"*Welcome to the channel where I lose at games and cook worse.* *Mostly fast fights, sometimes pancakes.* I upload content on a regular basis. *Sub or don't — the pancakes will still be sad.*" (Sentence 3 says: no note pointed at it. Two notes means two fixes, not a makeover.)
Last Check	#1 "'I enjoy various hobbies such as gaming and cooking' → 'I lose at games and cook worse.'" #2 "Section 3 says no textbook voice; Section 1 says funny and blunt." #3 "'Make it better' doesn't say what's wrong or what better means for ME. The note that named Section 3 told me which sentence and why."

THE REVISION LESSON • LESSON 4 OF 6

Teach AI Your Taste

Your For-You Page didn't guess your taste — you taught it, one like at a time. An AI doesn't know your taste unless you tell it, or it has saved notes about you. Students write theirs in a one-page taste file, then draft, get two notes, and revise. 45 min; stands alone.

AT A GLANCE

TIME	MATERIALS	TECH NEEDED	PREP
45 min	Worksheet, 3 pages, 1 per student (plus a typeable PDF copy) • pens • Slides (optional; the script is in the notes) • a board or projector • Teacher Guide (key and AI prompt)	None — fully unplugged. Optional: a projector and one AI tool on your own screen for the Step 2 demo	Print worksheets. That's it.

OBJECTIVES — STUDENTS CAN

- Explain why vague input gets vague feedback — from an app, an AI, or a person. (*Last Check #3*)
- Build a **taste file**: a one-page style guide an editor can actually use. (*Worksheet p.1, Sections 1–5*)
- Run the **editor loop**: draft it, get two specific notes, revise it yourself. (*Steps 1–3, Last Check #2–2*)

STANDARDS ALIGNMENT (full text + taught/assessed in the Teacher Guide)

CCSS ELA W.6.5

ISTE 1.1.c

CCSS ELA SL.6.1

WARM-UP — THE ALGORITHM KNOWS YOU (6 MIN)

Open: "Raise your hand if your feed knows you like too well." (Any feed counts: YouTube, a music app, even a game store's "recommended" row.) Then two people download the same app on the same day. A month later one feed is all horror edits, the other all cooking videos. The app didn't guess — **how did it learn?** Take 2–3 answers. Land on: every like, rewatch, and follow is a signal. Nobody guessed. You taught it.

Bridge: "Here's the other side. An AI doesn't know your taste unless you tell it, or it has saved notes about you. Today you write yours down on one page, then use it to make YOUR OWN writing better."

What if "my feed is random"? "Random is a signal too. What do you skip in the first second? That's a like in reverse." Nobody raises a hand? Name your own feed first.

Transition: "So what happens when your editor knows nothing about you? Let's see."

DIRECT INSTRUCTION — GENERIC IN, GENERIC OUT (6 MIN)

- 1 — **Generic in, generic out.** Ask "give me feedback on my paragraph" and you usually get notes for a generic writer: "add detail." True for anyone, useful to no one.
- 2 — **The taste file.** One page: tone, formats, pet peeves, one "so me" sentence. Hand it to any editor and the notes finally fit YOU. (*If your class did Lesson 1, How to Talk to AI: it's the R in P.R.O., written down once.*)
- 3 — **The editor loop.** YOU draft → editor gives notes → YOU revise. "AI is your editor, not your ghostwriter."

Which note could you use? On the board: "Make it more interesting" vs. "Section 1 says funny and blunt — sentence 2 sounds like a homework robot. Say it like you'd text a friend." Ask which one they could act on.

What if "the AI I use already knows me"? "Some tools save notes about you. A fresh chat usually doesn't. Either way, the file makes sure the notes fit."

Transition: "Page 1. Your taste, written down — five sections, ten minutes, solo. Nobody swaps yet."
